

Makomborero Zimbabwe is a small local Trust, which was set up in 2011 by Zimbabweans Mark and Laura Albertyn - to see lives and families changed through education. The following are the areas we are currently working in:

### ***A-Level Scholarships***

Our primary work is to provide A-Level education to talented students from orphaned or disadvantaged backgrounds. Gateway, Hellenic and St Georges, are the three private schools in Harare that kindly provide the academic scholarships to the students. We have a boarding house where our 16 students live during the week and benefit from Pastoral care, food and incredible resources. We also financially support (through paying school fees, examination fees and providing textbooks) for a further 16 students each year at local government schools.

### ***Local University Grant Scheme***

Many of our past students have since received full scholarships to study overseas, while others are enrolled at local universities and benefit from the Makomborero University Grant Scheme; a few are in industry working and studying.

### ***Mobile Science Laboratory***

Makomborero Zimbabwe is in the process of pioneering a Mobile Science Laboratory which will travel around High Density Schools giving laboratory time to Biology students. It is hoped to extend this further to another two laboratories - Physics and Chemistry. This is a great opportunity to reach out to a huge number of students.

### ***Giving Back***

We are proud to be able to give back to the communities our students come from through Revision schools during the August school holidays, as well as Black Board painting at rural school, around the outskirts of Harare.

Makomborero Zimbabwe is a small but dedicated team of Zimbabweans, who are passionate about seeing lives changed.

If you would like to help Makomborero Zimbabwe continue their pioneering work, please contact us to find out how you can help.
