

## Rebuild the home and livelihoods of 100 flood victims in Nepal

The project aims to rebuild the 100 homes and livelihoods over the year that was completely destroyed by the flood in southern Nepal on the 12<sup>th</sup> of August 2017.

### Overview:

The horrendous flooding caused by the continuous heavy rain in southern Nepal has took life of 74 adults and children, displaced 5,000 families and severely affected 5 million people. The families have lost their home, belongings and livelihoods. We aim to rebuild the home and livelihoods of the 100 families through this project.

### The problems:

One week of continuous heavy rain brought horrendous floods in the southern Nepal. The rivers overflowed, embankments were destroyed on the 12<sup>th</sup> of August 2017. The most recent record shows 74 adults and children found dead, 5000 homes completely swept out and 5 million people are severely affected by the floods.

Many people are addressing the immediate needs but that will not put them back on their feet. The families who have lost their home are poor because their home is not built properly.

### The solutions:

Through the project, we will rebuild the home and livelihoods of 100 flood victim's families. We will buy everything that is necessary to rebuild a safe home and to create a sustainable livelihood for them. This includes, bricks, cement, cement pillar, bamboos, tin roof, seeds, a cow, a goat and some cash. We will also repair/rebuild a toilet and water pump.

### The impact:

Having a safe home to sleep and something to rebuild a livelihood on will not just stop them falling in a greater poverty, it will lead them out of poverty. The families will be better prepared for the future flooding and earthquake. We will also persuade the families to send their children school regularly for a brighter future.

### Project budget:

Total budget for the project in Nepalese rupees is 18,895,000 or US Dollars \$184,027 or in Pound sterling £145,350 (on average £1,454 or \$1,840 per family).

	<b>Project activity</b>	<b>Quantity</b>	<b>Cost Rs (,000)</b>
01	To rebuild the home:	100	
	Construction materials		10,300
	Labor cost		1,000
02	To rebuild the water pump:	100	
	Materials cost		800
	Labour cost		200
03	To rebuild the toilet:	100	
	Materials cost		900

	Labour cost		600
04	Buy seeds to grow vegetables	100	500
05	Buy a female goat and a cow	100	2,500
06	Micro Finance	100	800
07	Meeting and consultation	10	50
08	Project planning	1	60
09	Beneficiaries identification	1	40
10	Implementation and monitoring (3 fulltime staff)	1	800
11	Auditor, reporting and communication	1	80
12	Rent, utilities, transport and others	1	265
		<b>Total</b>	<b>NRs 18,895</b>
		<b>In US Dollars</b>	<b>\$ 184,027</b>
		<b>In Pound £</b>	<b>£ 145,350</b>

**Money value in Nepal:**

£5 buys enough seeds to grow vegetables for a family for a year

£25 buys eight bamboos to rebuild the homes

50 buys a female goat

£75 will rebuild a water pump for clean water for a family

£100 buys a cow

£230 buys enough tin to roofing a house

£1295 will buy everything that we aim to buy for a flood victim's family
