

## Strengthening Our Commitment: Introducing the Sustainable Futures Coordinator (SFC)

Dear Friends and Partners,

We are pleased to share an exciting development in our journey towards empowering single mothers and their children. As part of our expansion efforts, we are in the process of establishing BEF2, with the goal of supporting an additional 50 mothers and their children over the coming 4 years. We are planning to add 20 families in 2025 making the total of 70 families impacting approximately 200 beneficiaries.

As highlighted in our previous reports, one of our greatest challenges remains fostering sustainable futures for the families we support. To address this, we are introducing a new key position within our organization: the Sustainable Futures Coordinator (SFC).

### The Role of the Sustainable Futures Coordinator (SFC)

The SFC will play a vital role in guiding and empowering our beneficiaries on their path to independence, self-sufficiency and financial sustainability. This role will focus on:

- ***Skills Development & Job Training:*** Providing mothers with practical training and employable skills.
- ***Financial Literacy & Employment Support:*** Equipping them with essential financial knowledge and connecting them to job opportunities.
- ***Entrepreneurship & Small Business Development:*** Identifying and facilitating sustainable income-generating activities tailored to each mother's capabilities and interests.
- ***Seed-Funding & Economic Growth:*** Expanding our efforts to provide initial funding for mothers eager to start their own small businesses.
- ***Personal Growth & Community Resilience:*** Conducting motivational sessions, group discussions and one-on-one mentorship to build confidence, leadership and a growth mindset.
- ***Strategic Partnerships & Advocacy:*** Collaborating with local businesses, organizations and training institutes to create employment and entrepreneurship opportunities, while advocating for women's rights, social inclusion and access to essential services such as healthcare and counselling.

## Why This Matters

The SFC will be instrumental in breaking cycles of poverty and ensuring that the women we support achieve long-term financial independence. By fostering economic stability and resilience, we are not only transforming the lives of mothers today but also securing a brighter future for generations to come.

We deeply appreciate your continued support and collaboration as we take this critical step forward. We welcome your thoughts, partnerships and contributions as we work together to expand our mission to a different, undeserved community and make BEF2 a beacon of hope and opportunity.

Thank you for being part of this journey.
