

32 years transforming lives

Established in 1987, Amigo Daniel, A.C. It is a nonprofit institution, whose mission is the comprehensive care of children who are victims of abuse with an emphasis on restoring their right to live in a family, their own family preferably, and if it is not possible, with a new family through adoption, since it is known that a long-term institutionalization can be detrimental to their development.

The children sheltered in Amigo Daniel, are characterized by being in social helplessness for different causes, where a constant is not only the lack of care and attention to their basic needs at a very young age, but even abandonment, mistreatment and physical abuse and psychological by those who by nature should give them protection, love and care: someone in their own family, frequently their parents, who in turn drag stories and psychosocial and economic circumstances that do not allow them to treat parenthood in a healthy and positive way, as it ideally should be.

Once the victims are rescued and channeled through the National System for Integral Family Development, Public Security and Public Ministry systems, our Institution provides them with comprehensive care trying to heal their physical and emotional wounds, as well as ensuring their social reintegration in the best possible conditions.

In Amigo Daniel we have been concerned with compensating the physical and emotional wounds of protected children, being psychological care, medical and nutritional care, an elementary part of the integral service provided, however we cannot leave aside how important are the first years in the formation of habits, development of independence and security, as well as encouraging curiosity and interest in learning and the construction of knowledge.

*Help them to have
a better future!*
