Recent Campaign

Train 50 Youths Against Cybercrime In Nigeria

Cybercrime is a global problem and is unrestricted to national borders or sectional distinctions. As such, tackling cybercrime require a multi-stakeholders approach with input from all sectors and disciplines (Government, security agencies, International Organizations, Civil Societies etc.), bilateral and multilateral agreements, participation of international for associations, public-private partnerships, inter-agency partnerships, best practices and so on. Greater corporation can enable the development of much stronger cyber security capabilities, helping to deter repeated and persistent online threat and to enable better investigations, apprehension and prosecution of malicious agents. National and international cooperation is evaluated based on the number of partnerships, cooperative frameworks and information sharing networks.
