DELIVERY AND IMPLEMENTATION OF UNESCO MEDIA AND INFORMATION LITERACY CURRICULUM ADAPTATION ACROSS SELECTED SCHOOLS IN NIGERIA (FUNDED BY UNESCO AND THE SWEDISH GOVERNMENT)

Project Status Report

Summary:

We live in a world where the quality of information we receive largely determines our choices and ensuing actions, including our capacity to enjoy fundamental freedoms and the ability for self-determination and development. Driven by technological improvements in telecommunications, there is also a proliferation of media and other information providers through which vast amounts of information and knowledge are accessed and shared by citizens. Adding to and emanating from this phenomenon is the challenge to assess the relevance and the reliability of the information without any obstacles to citizens' making full use of their rights to freedom of expression and the right to information.

It is in this context that the need for Media and Information Literacy (MIL) -school- club is proposed to be established across Senior Secondary Schools in Nigeria using the **SPELL&THRILL!** platform as a fulcrum. The UNESCO MIL) -school- club is billed to serve as a viable means and platform for expanding civic education movement that incorporates teachers as principal agents of change and students as the next generation of civil actors.

Media and Information Literacy (MIL) is a “combination of knowledge, attitudes, skills, and practices required to access, analyse, evaluate, use, produce, and communicate **information** and knowledge in creative, legal and ethical ways that respect human rights” (Moscow Declaration on **Media and Information Literacy**, 2012).

Empowerment of people through Media and Information Literacy (MIL) is an important prerequisite for fostering equitable access to information and knowledge and promoting free, independent and pluralistic media and information systems.

Media and Information Literacy recognizes the primary role of information and media in our everyday lives. It lies at the core of freedom of expression and information - since it empowers citizens to understand the functions of media and other information providers, to critically evaluate their content, and to make informed decisions as users and producer of information and media content.
