Gils in Classroom studying.

Training and seminars on HIV/AIDS for youth

Major Alliance Education Centre(MAEC) is an organization which is facilitating the education of children. This is because most of the community members are not prioritized education to girls. They value boys than girls. Girls are given the burden of domestic activities while boys are studying and getting careers for their bright future. MAEC as one of women organization is facilitating these children through facilitating them to their studies. Which include provision of school and scholarstic materials so that to upgrade their education status. The drop out of girls from schools particularly vulnerable children such as orphans are also taken into consideration by providing with them with education ,counseling and psychological education.

Major Alliance Education Centre(MAEC) is also providing education against drug abuse and HIV/AIDS whereby the organization provides the training in seminars and sometimes through mobilization education through their schools. Although MAEC is providing that service to its beneficiaries its carrying ist activities in insufficient funding. We welcome other stakeholders to assist us. The organization is doing its activities in hard time providing non formal education through poor infrastructures such as classrooms,benches and other school's infrastructures.
