

Moldova

a land of potential

Moldova's resources

people

Moldova's resources

and land

the **R**eality

the Reality

Weak economic growth

+

Political instability

=

Massive migration

the Reality

Less than 10% of grain/vegetable exports are processed
(Agriculture Report – invest.gov.md)

Which means adding value has big potential

But what if...
we look at the international success of
the **S**haring economy,
Incubator/**m**aker Spaces,
and co-**W**orking hubs...

and intersect those with Moldova's
agricultural legacy?

Our proposal:

Moldova's first

food business incubator

a place where

new food business start-ups take root

a place where

certified kitchen space is rented
hourly, daily, or longer

a place where

existing food businesses become
more profitable

a place where

community health education programs
are organized

katalyst
kitchens®

a place that offers...

an Entrepreneurial ecosystem

Financial planning

Certification, permits

Food engineering, recipe scaling

Process optimizing

Ingredient sourcing

Nutritional analysis

Access to capital

an Entrepreneurial ecosystem

Open classes

Coaching, mentoring

Networking

Food safety

Marketing & distribution

Branding

Legal/HR

our team

David

15 years general
management

Valeria

10 years social
entrepreneurship

Ludmila

30+ years food system
quality control

our team

Andrij

International
development

Adelina

Food process
engineer

Daniela

agri-business operations
/ education
