

## OUR INCLUSIVE EDUCATION PROGRAMS

We started from the observation that people with visual impairments rarely completed their school and university education.

People with albinism and the visually impaired in general have difficulty accessing textbooks, usually because the characters are too small.

The Focus association has set up a series of projects to facilitate reading to the social category mentioned above.

The first project is the creation of a specialized library for the blind and visually impaired, equipped with magnifiers and many other suitable devices

Since not everyone could afford a magnifier, we have set up another more flexible project which is the transcription of textbooks in large print for the visually impaired and in Braille for the blind.

We also make audio books for the blind

Another project we have to support the education of visually impaired people is called "io ti vedo" which consists in paying for the school fees of very needy albino and blind children.
