

## **GRASSROOT ALLIANCE AGAINST COVID 19**

**Kiangure Springs Environment Initiative(KSEI) have joined forces with leaders from different sectors to launch the Community Action Response to encourage everyone to do what they can to support their communities and particularly vulnerable and isolated people during the Covid-19 crisis.**

We officially launched our Grassroots Alliance Against COVID I initiative and we consulted widely with our Grassroots partners on how to respond to the spread of COVID-19. The positive response for this gathering was overwhelming — this is the good news! We hope that you may find some joy in being a part of a collaborative grassroots movement that is bringing people together to respond to the Pandemic.

All donations made to this emergency fund will be used to support our response to COVID-19 through interventions such as hygiene education, constructing hand washing stations, distributing food aid, and providing face masks.

**The need is great.** This is where you come in. would you join us in empowering and protecting the communities we serve? Our board has already committed \$1,000 to the corona virus emergency relief fund. Now, our goal is to raise \$100,000 over the next two months. Please consider a donation today ( whatever you are able) to help us respond quickly to a time-sensitive crisis.

Our promise to you is that we will make decisions about where to invest grant funding based on collaboration with organizations responding on the ground, and trust they know best regarding how to meet their growing needs. As always, we are committed to reporting back to you with transparency and integrity.

[Grants](#) will address the following priority areas:

- Immediate basic needs of economically vulnerable populations caused by closures and cancellations related to COVID-19
- The elderly and other high-risk populations who are experiencing a COVID-19 impact
- Residents who are food insecure
- Residents who have no medical insurance or who are under insured

**With deep gratitude,  
Kiangure Springs Environment Initiative**
