Project area: Ruhango District, Kabagali Sector, Southern Province, Rwanda

2. Problem statement

Due toThe COVID-19 pandemic the global economic recession is project in 2020. The IMF's projection of annual GDP of as follow: 3,5% in 2020 from 10.1% in 2019 and agriculture also

is affected as it contribute 5,8% of productivity . Good measure taken by Government to stop COVID-19 spread for saving lives of people's but Several sectors shocked even agriculture where more than 75% in Rwanda are Famers among small young famers affected and this project will help them to stay on frontline and contribute in Food security in Rwanda

3. Solutions

-RODI provides technical assistance and equipment's - Young Farmers trained in modern technology of agri faming and Livestock through demonstration plots and improved inputs for increasing productivity . Multiplication of pineapples seedlings in order to sell and distribute to other Farmers around the them. The Cows and poultry farming also is quick win of getting Manures and Milk and eggs for over come quickly the shock of COVID-19

4. Impact

The project will help 90 youth farmers to allowing them to arise out poverty and become Entrepreneurs .The Seeds and nurseries will be available in the community and youth will teaching community in peer learning approaches and 500,000 Seedlings of Pineapples will distributed to the community .

	Total		31,585

7. Monitoring and Evaluation

Monitor Progress of Performance and Accountability: through this strategy we normally involve meetings to discuss the various projects and programs that will be required. Meetings are critical to help bring together the focus in this phase to do the following: Manage people, follow processes and Communicate information to all key stakeholders, sponsors and team members. RODI Team should evaluate and indicator and provide the feedback to the stakeholders for smooth Implementation and analyze if the project outcome will be realized.
