

One of the projects of Heroes for All Inc

(We need to teach kids how to think for themselves and how to become responsible global citizens)

The School is a project focused on merging dreams of philanthropic-minded people who would like to bring positive change through progressive learning in local rural communities.

The project is not only aiming to build the school house that focuses only on **advanced curriculum-based** learning but plans to act as the **catalytic agent** to educate the mothers and the guardian through active participation in their children's education. It will be a pilot project for small communities that can become an agent of transformation creating a safe-space and learning center to build a better, cleaner, and informative community.

Besides providing quality education in the Ashulia community (At the outskirts of the capital of Bangladesh) catering the need for children of local farmers and Ready Made Garments workers-- The school project also will be empowering and supporting an Acid Attack Survivor who was a student of Diploma engineer and had a dream of starting school. Identifying the need to help women become aware of their strength as a mother and a teacher... the school therefore will be a platform to educate the women of the community in different areas of life skills during weekends and after-school hours with a special emphasis on English communication

Current Stage of the Project: The 1st floor of the two storied school building is complete. The work for the second floor Roof is taking place. To open the school in January, 2021- we would need fund for furniture's, and cover of operating cost for the first few months.

The Program Goal of HFA addressed through this project

Goals 1: To instill the ability of transformational leadership in young people so they can emerge as a force of positive change in their communities

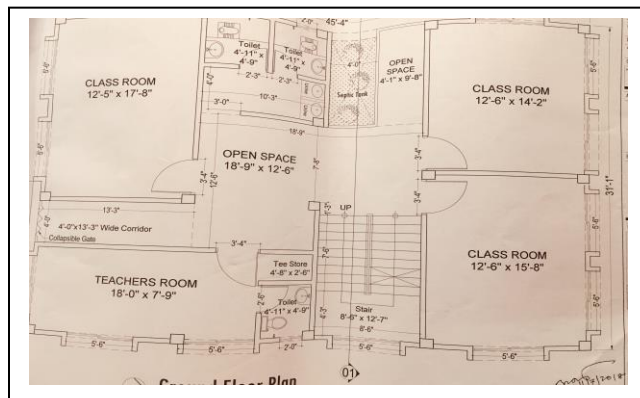

Goal 3: To create a connecting platform of individuals, organizations and community members who would work together to build a supportive environment of positive growth to help the youth reach their true potential.

Goal 4: To build awareness on the positive use of leisure time that can foster self-expression, development of identity, feelings of autonomy and sense of achievement and learn the skills

Value: Every Child from irrespective of social background, religion, ethnicity or disabilities can rise to their potential if proper environment and guidance is provided from early childhood.

Objective: To build a school for low-income and underprivileged children in Ashulia Industrial Zone that will provide effective early childhood learning experience in Bengali medium with extra emphasis on English language. The Primary school education will be designed in a way so that the children from **Pre-K to grade 5** can have the right tools of communication and life skills to become-----

- an independent and creative learner*
- Caring and environmentally conscious citizen*
- *Critical thinker*
- Better communicator in both Bengali and in English*
- Aware on one's own interest and true potential*
- Responsible adult on health & hygiene; and*
- A person of strong moral character with a positive mind-set.*

Strategies

- Engaged learning and teaching through hand-on experiences, field trips, career days, community engagement projects, development of reading habits, leadership camps, self-discipline, team-work, competitions, imagination and creative thinking, arts and culture, disciplined work-habits, involvement in play and sports
- Create Community connectedness through programs that brings the community together such as school fair, reading clubs, computer training for both adults and children, monthly parenting workshop, creating scope for parents to volunteer in their children's class, neighborhood clean-up programs
- Continuous teachers' development through training by experts in the field of child psychology and well-being, and early childhood learning experts.
- Help the learners to develop language skill from early age both with the proper pronunciations of Bengali and English language. Interested **Volunteer teachers, students from USA and from Bangladesh will be involved with the local kids encouraging the learning through experiential methods and mentoring.**
- Building strong moral character and ethical standards through monthly programs on

Funding Source: This project is funded through personal donations, and will be self-sustaining with the school fee (500 Taka). Sponsors will be assigned for children who are in need.

Donor Acknowledgement: A wall acknowledging the contributors will be included titled (**Tree of Hope**) to honor those who believed in the purpose of the school. Classrooms will acknowledge the donor's contribution through a built in Plaque in the donors name in each room that will be supporting with 3 lacs or more.

Your Mind is a garden.
