

## **ONE SLEEPING BAG FOR ONE LIFE!**

Due to the pandemic and the collapse of the economy, Nepal is facing a humanitarian disaster of an unprecedented scale!

40% of Nepal's population, approximately 12 million people, is poor. This means that they are living on less than \$ 1.25, - a day.

The majority of them are day-laborers and they are literally living from the hand in the mouth. Since the beginning of the lockdown six months ago, people are out of work and they are without any revenues.

Most of these people live in the villages in higher altitudes between 500-M and 1500 M. Many of them live in rickety huts or makeshift shanties without any adequate protection from the freezing cold. For many children, the combination of malnourishment and a lack of protection from the cold will have fatal consequences.

We are providing food for as many as we can, but these people and the children in particular urgently need sleeping bags.

We are prepared to distribute 1000 sleeping bags to this target group before the winter is setting in and protect them from the freezing cold.

The price for one sleeping bag is around Euro 25,-

Namaste
