

New Flooring for the VICM

The Virgin Islands Children's Museum aims to improve the safety of the museum while beautifying the space. You can help by funding the purchase and installation of vinyl plank flooring throughout the museum.

The dance room floor is made of vinyl flooring and the VICM hopes to expand this clean and lovely look throughout the museum. Kids regularly kicked up the existing carpet tiles and the old, broken and uneven tile underneath is not acceptable in such a high traffic environment. Vinyl plank flooring will give families a safer place to play and make cleaning and maintaining a healthy learning environment an attainable goal for museum staff.

Donations will help with the purchase of the 68 cases of plank to cover over 1,600 square feet of museum floor as well as the tools and staff hours needed to install the material. Yes, the VICM staff plans to install the flooring themselves to save on installation costs and gain some new carpentry skills!

Please help the Virgin Islands Children's Museum help families Explore, Play, Discover in a safe and aesthetically pleasing museum space.

Sincerely,

The VICM Team
