

Who Are We?

El Patojismo's identity is about service and human dignity. Our project is an inclusive and safe zone for all our students and families.

Our philosophy is based on human, technical, and academic development processes. The human part focuses on the development of critical and analytical thinking, recognition of the social reality of the country, conflict resolution, responsibility, good interpersonal relationships, proactivity, and service. Art, music, and sports allow the kids to connect with their own and collective identities. In the technical and academic part, the students are educated so that they can become bilingual, learn technological tools, understand sciences, and develop good public relations.

WELLNESS PROGRAM

In this recently added program to our project, we want to succeed in educating our students who are suffering from physical abuse, sexual abuse and malnutrition. Children everywhere deserve assistance to overcome adversity in their lives. We have designed a multifaceted program for more than 500 Guatemalan children.

Our Wellness Program includes:

- Medical assistance.
- Psychology program.
- An improved nutritional program.
- Art therapy.
- Breathing techniques and meditation.
- Sports therapy program.
