

## Wildlife ACTive Summary - Global Giving

**Subscribe to our virtual group for just \$10 per month. This way you get to take a bit of the African bush home with you, stay connected to our teams in the field and protect it from afar. You might also want to gift someone a subscription for an upcoming birthday.**

Since 2008 we've spent over 237 000 hours in the field doing crucial conservation work. In collaboration with our partners, we've collared 335 Wild Dogs, removed 122 snares, and relocated 489 individuals to new protected areas. Of approximately 550 Wild Dogs left in South Africa, we have helped save 115 of them from likely death.

We've supported the deployment of collars on 89 Cheetah, 170 Lion, 28 Elephant & 246 Rhino! We've helped fit wing tags to 207 endangered Vultures, as well as essential GPS units to 98 of them and responded to 70 Vulture emergency response events. These are just a few things that we're really proud of.

The Wildlife ACTive group (WhatsApp) allows our support network from around the world to connect with our team and receive updates from our various projects. Think interesting facts, images & videos, animal behaviour, bush quizzes on tracks and signs, bird song and endangered species management interventions. We have some new and exciting things coming soon on the Wildlife ACTive group. Don't miss out, become a part of the pack!
