## Restoring Hope, Rebuilding Lives

Meet 20-year-old Rabia, a college student who arrived at Fatima Memorial Hospital with excruciating joint pain, limb swelling, fluid in her lungs, and kidney malfunction. She found herself lost, without hope, and shattered dreams of a college education.

In her darkest hour, Rabia was referred to Fatima Memorial Hospital, where a medical board diagnosed her with Systemic Lupus (SLE). By the grace of Almighty Allah, the physicians at FMH were able to provide extensive treatment to Rabia, which continues to date as SLE, while manageable, requires lifelong treatment. It was only with your Zakat donations that Rabia's treatment was, and remains, free of cost to her.
