

# LET THE CHILDREN HEAL FIRST

## With Your Ramadan Donations, Fitra and Zakat.

**Feeding a poor family, healing a sick child, making a tearful mother smile is the best of worships in Ramadan. The blessed month of Ramadan is the sultan of eleven months.**

What makes it precious is that our holy book, the Holy Quran, was revealed in this month.

Ramadan is the month of fasting, worship and patience. In this month, which has an important place for the Islamic world and strengthens the cooperation between the rich and the poor, fitra and zakat should be given as worship.

### WE GIVE LIFE TO MILLIONS OF POOR PATIENTS WITH YOUR FITRA AND ZAKAT

LÖSEV works with the principle of "All children are born equal and receive the best treatment equally" and we offer treatment with 94% complete success completely free of charge.

With your Ramadan Feast donations, we meet all the needs of our children with leukemia and their families, from intensive care to blood and platelets to overseas medicines. In this month when the cooperation between the rich and the poor is reinforced, connecting a Child with Leukemia or a poor adult Cancer Patient to life and making his/her family smile is the best worship you can do.

**We take the highest quality food aid to their homes and distribute it for 12 months. This speeds up their body defenses and recovery.**

### "THERE IS NOTHING MORE PRECIOUS THAN THE LIFE OF A CHILD"

*25 years ago, Dr. Üstün Ezer founded LÖSEV with this promise and today he has created miracles with 94% treatment success. Unfortunately, Leukemia and Cancer are increasing like an avalanche in our country. LÖSEV provides free treatment to all patients, both children and adults, without discriminating between rich, poor, eastern or westerners. LOSEV deposits money into the mother's bank account and provides food, fresh meat and white goods to everyone equally. Our need for your donations and support is increasing in order to reach everyone fully.*

***Our goal is to achieve 100% treatment success in leukemia and to find a cancer vaccine.***
