# I Love Learning Newsletter August 2024

Our Non-Profit Has Provided an English  
Education to Over 20,000 Rural Chinese  
Students

## A Heartfelt Thank You to Changtu County

We would like to extend our deepest gratitude to all the locals of Changtu County for their unwavering support over the last 12 years. This includes our dedicated students, their supportive parents, donors, our hardworking staff, and our enthusiastic online fans.

Our journey began in Changtu with a clear mission: to provide rural Chinese children with a quality English education. Through our efforts, we have witnessed many students break the cycle of hardship, complete high school, and gain admission to prestigious universities. Your continued support has made this possible, and for that, we are profoundly thankful.

Since 2012, we have strived to ensure the highest quality of teachers, many of whom have traveled from across the globe to share their knowledge and insights.

*Since 2012, our programs  
have helped thousands of at-  
risk and disadvantaged rural  
Chinese students stay in  
school.*

## Upcoming Event

## Latest Updates

As of July 2024, our English education program has benefited over 20,000 students in Changtu County, many on free or subsidized scholarships. Our students are excelling in public school, advancing to middle and high school, and many have progressed to university and secured rewarding jobs.

We are glad to announce the effectiveness of our Systematic Synthetic Phonics Program which has received very positive feedback from students and parents and has helped many children in Changtu County achieve literacy.

Our curriculum covers Listening, Speaking, Reading, Writing, and Grammar, preparing students for exams and effective communication in a global context. However, high dropout rates in rural China remain a challenge.

With your support, we aim to expand our programs into rural areas, providing the necessary tools for students to stay in school and succeed. Together, we can transform more lives through education and ensure a brighter future for these communities.
