HELPING PEOPLE WITH KIDNEY DIALYSIS PROJECT

General information:

- Patients with chronic kidney failure will have to undergo regular dialysis at the hospital 2-3 times per week. The difficulties of people on dialysis are poor health, reduced ability to work, and the cost of medicine and travel. Every time they finish dialysis, they are exhausted and cannot do anything. They become a burden on their families. Therefore, they always feel inferior, and if they are the main economic pillar in the family, the pressure is even heavier. Even though they have health insurance, patients still must pay up to 20% of the cost, equivalent to 1 million to 5 million VND/month, not including travel and nutrition costs...
- The Lotus Charity Foundation (LCF) has launched the “Helping people with dialysis” project. Since June 2024, the LCF has been implementing the program at four hospitals in Ho Chi Minh City, and by August 2025 it has expanded to support patients in Gia Lai, Quang Tri, and soon in An Giang, Nghe An, Khanh Hoa, Quang Ngai, and other provinces. Providing financial assistance for treatment helps ensure that patients can maintain continuous dialysis. Hospitals are therefore able to monitor patients’ treatment regularly and intervene promptly in case of unexpected situations. At the same time, families experience reduced financial burden, allowing them to maintain essential needs such as nutrition, daily living expenses, and their children’s education.

Who will be supported?

- Patients from poor or near-poor households
- Patients receiving social benefits due to illness
- Patients with a certificate of difficult circumstances from the locality

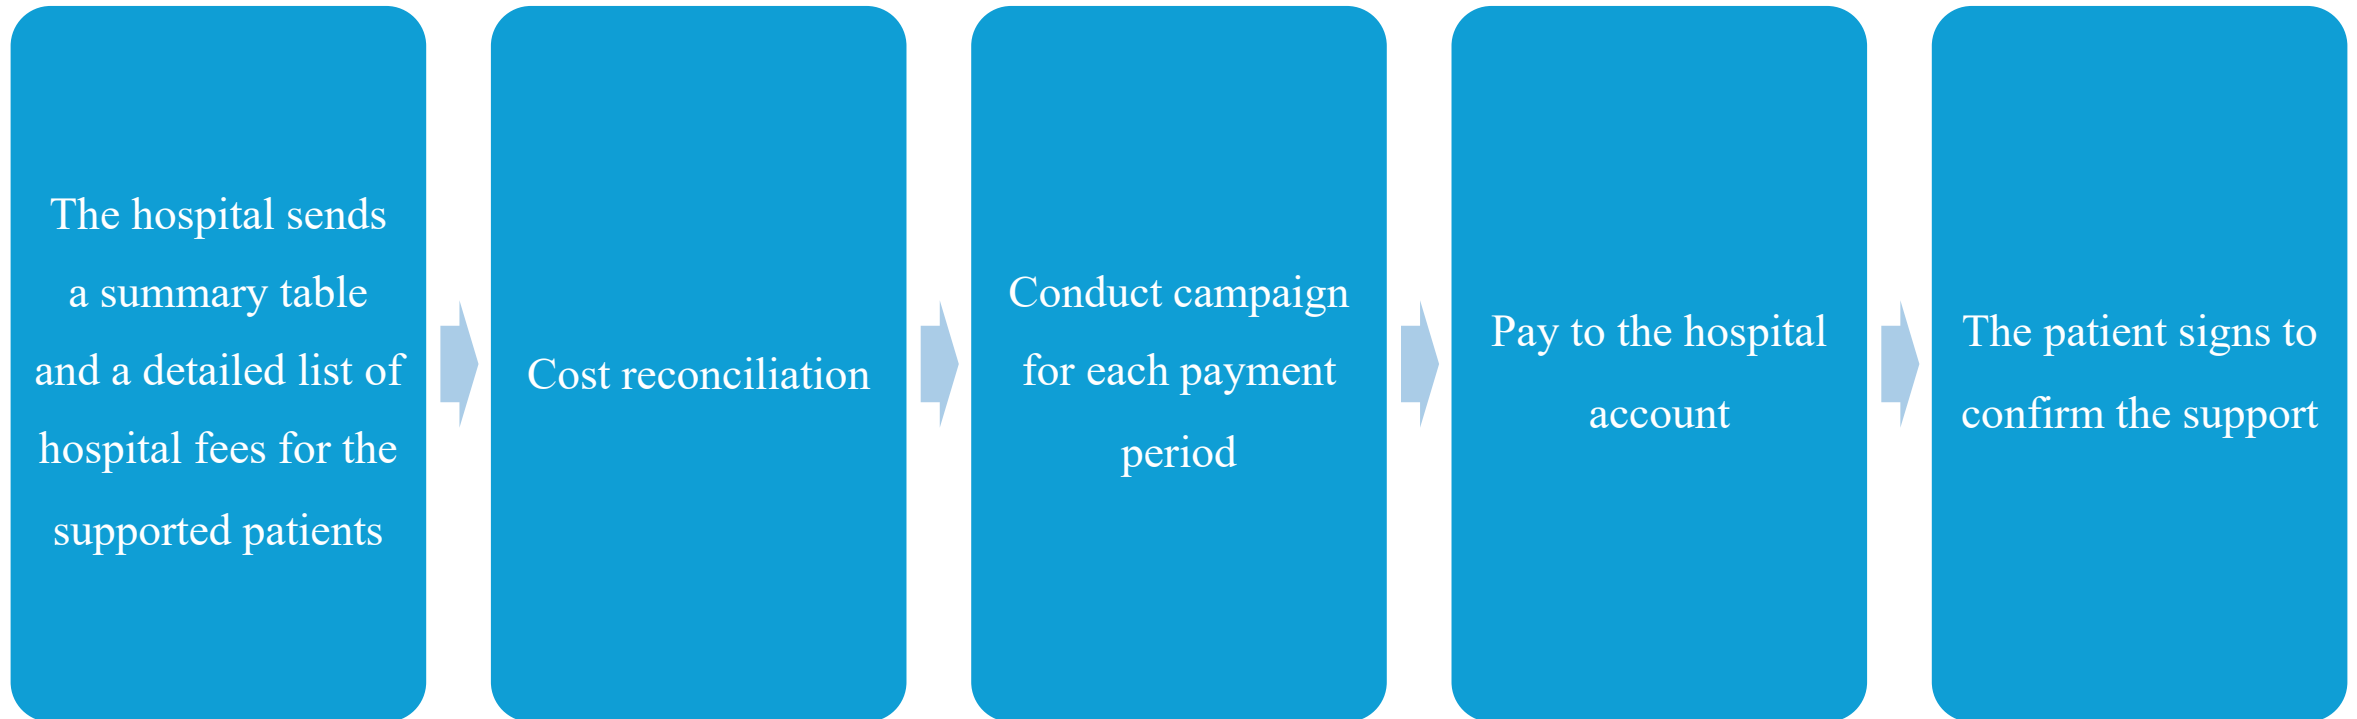

How to support?

Supporting will be implemented by LCF a sponsorship agreement with hospitals to receive patient records in need of support. After verification and approval, LCF will pay directly to the hospital based on the actual monthly costs of the patient.

Monthly payment process

Monthly budget:

- LCF is supporting 354 patients at 6 hospitals in HCM with a total cost of about 195.000.000 VND per month.
(Figures based on August 2025 support costs)
