### **Material Activities**

Serving with Compassion:

Our organization is dedicated to serving others through religious and humanitarian activities. We believe that every person deserves to be treated with dignity and respect, and we strive to reflect this in everything we do.

Charity activities: Technical High school activities

Few years ago, when we went to the village of Danzounme for religious program, I discovered a deep poverty in the region. I was so moved by compassion. After some time of reflection and prayer the vision of breaking the cycle of poverty through education came alive in me. That is where it started.

We have planned to start a Technical High school in the village for the whole region and beyond.

Below are some pictures:

We bought land of more than 3 hectares for the project

**In the above picture is when we have started the construction work**

Right now, we have built a dormitory for girls and boys, three classrooms down stair and four classroom upstairs facility.

That is where we offer educational and training programs for youth and adults.

**In the above pictures, electrical engineering students are doing practices**

**In the above pictures, civil engineering students are doing practices**

Impact: Our activities have a positive impact on the lives of the people we serve. We are grateful for the support of our donors and volunteers who enable us to continue serving.
