Family Workshops on
Health, Education, Financial
and Institutionalization
topics.

Impact

How do you measure the impact of your work? Is this done internally or externally or both?

We are finishing a 2 year "Model Replication" Study with a validation and impact measurement process.

Validation is through a committee of 3 experts who should validate our intervention model.

Our impact evaluation will be with MIDE UC (specialized institution in social measurements)

- Sergio Bernales: Director Chilean Family Therapy Institute
- Heydi Román: Legal Clinical Director of the Pontifical Catholic University
- Carolina Muñoz: Expert in residential childhood, Professor of Social Work PUC
- Representative of the Protection Service of the Ministry of Social Development

Strategic impact
