

PROJECT FLERI

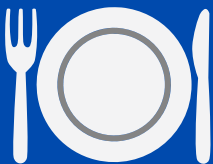

OUR MISSION

We help youth flourish in education, families, and communities through quality education.

OUR IMPACT

#1,000 students served

#900 children fed daily

#27 Full-time Haitian employees

OUR STORY

In 2019, Emily founded Project Fleri to help the people she loves to flourish through education family, and career opportunities.

She established the Welcome House as a transitional home for orphaned children and launched an educational program.

Since the start of the educational program, Project Fleri has formed a team of dedicated educators and local community support for our students

Our Approach

1

Plan

We work with the teachers and families to craft an education program that will help our students be their best selves.

2

Engage

We engage the students, families, and even local community to ensure success of all of our students.

3

Support

We continue to holistically support the person and their family.

GET INVOLVED

Your donation today will help to fund mental health for our students in Haiti. The care will be extended to the students and their families. When we invest in our students and their home lives they show up to school as their best selves. Your donation can directly change the trajectory of their lives.
